

Cleaning your DuraFlex partial

In order to keep your **DuraFlex** partial looking as good as new, it is important that you maintain good oral hygiene and take proper care of the appliance.

- After meals, rinse appliance to remove any food particles.
- Clean your appliance daily using an antibacterial denture cleanser.
- Only use a soft bristle brush and scrub gently to avoid damage.
- Never use any abrasives such as toothpaste or powdered household cleanser to clean your appliance.
- Handle your appliance with care.
- Contact your dental professional if you experience any discomfort. Your dental professional will advise you when to come in for a regular checkup.

DURAFLEXTM
PARTIALS

Congratulations!

Your DuraFlex partial has been custom made for you by dental professionals to fit comfortably and look natural.

With proper care, your appliance should provide years of use.
