

Which partial will you choose?

Conventional
Metal Partial

Myerson DuraFlex Flexible Partial

DURAFLEX™ PARTIALS

For the most natural look and comfortable fit, choose Myerson DuraFlex for your partial denture. myerson DuraFlex is a state-of-the-art thermoplastic dental material that is lightweight, flexible and stain resistant.

Why should you ask for a

DURAFLEX™ PARTIALS

flexible partial denture?

- Natural looking – blends in with your smile.
- Comfortable – lightweight and flexible
- Reliable – myerson DuraFlex is virtually unbreakable, providing years of service.

“My patients tell me that they are light and are comfortable to wear and I love that they just snap into place.”

Dr. V. Kim Kutsch
