

Want Ink?

Why not TAT your TEETH?

You think it, we'll ink it.

Add a creative touch to your smile and join the newest trend in dentistry – crown tattoos!

Crown tattoos are a permanent design that has been hand-painted on your dental restoration. Most crowns and bridges are eligible for a crown tattoo on the front or back of the tooth. From a simple to a more detailed design, anything is possible as long as the design fits on the selected area of the crown.

Ask your dentist for more information about getting your next crown inked by dental technicians at **Oral Arts Dental Lab.**
